# 1 Welcome

## AirNav FS Live Traffic 3

### for Microsoft Flight Simulator X

AirNav Systems is the market leader for Flight Tracking Software, supplying live flight information for all flights in the US and Canada, and other regions of the World. MyTraffic, awarded for the third time as best Artificial Intelligence (AI) traffic add on for the Microsoft Flight Simulator by more than 9000 voters of the Simflight award, brings the most complete, yet working and frame rate friendly AI traffic into your flight simulator.

These two best of the best now came together, and AirNav Systems presents to you:

### AirNav Live FS Traffic 3

What is it about? No longer your traffic will follow the published schedules of airlines, as first generation AI traffic products did, or optimized schedules for the Microsoft Flight Simulator X world, as MyTraffic does - now you will jump into the traffic as it is in real world - your simulation will initiate one minute before you fire up Microsoft Flight Simulator X.

Every canceled flight, every delay, every new flight will display, live instead of recorded. Sounds complicated? Not at all. The AirNav Server processes live traffic data and generates updates every 60 seconds containing information on what is in the air or on the ground – a small program fetches the data and puts it into the folder inside Flight Simulator – once this is done you start Microsoft Flight Simulator X. No longer will you waste your time with optimizing traffic - you are live.

## 1.1 Main Features

### What does AirNav FS Live Traffic 3 bring to you?

AirNav FS Live Traffic 3 brings you a selection of 61 basic aircraft models with more than 600 textures, representing all those aircraft that appear frequently. These models have been designed specially for FSX and AirNav FS Live Traffic 3, combining high detail and excellent frame rates, far above any other available models including converted FS9 models. No compromises have been made – these aircraft designed using GMAX use the latest High-Poly Low-Drawcall technology.

Also, it brings a collection of about 60 major enhanced airports, optimized to support aircraft that actually fly into them.

## 1.2 Example Scenery

### FSX Screenshots

Here are some screenshots of FSX showing the scenery that is available with AirNav FS Live Traffic 3:

#### Africa

Cairo (HECA)

Cape Town (FACT)

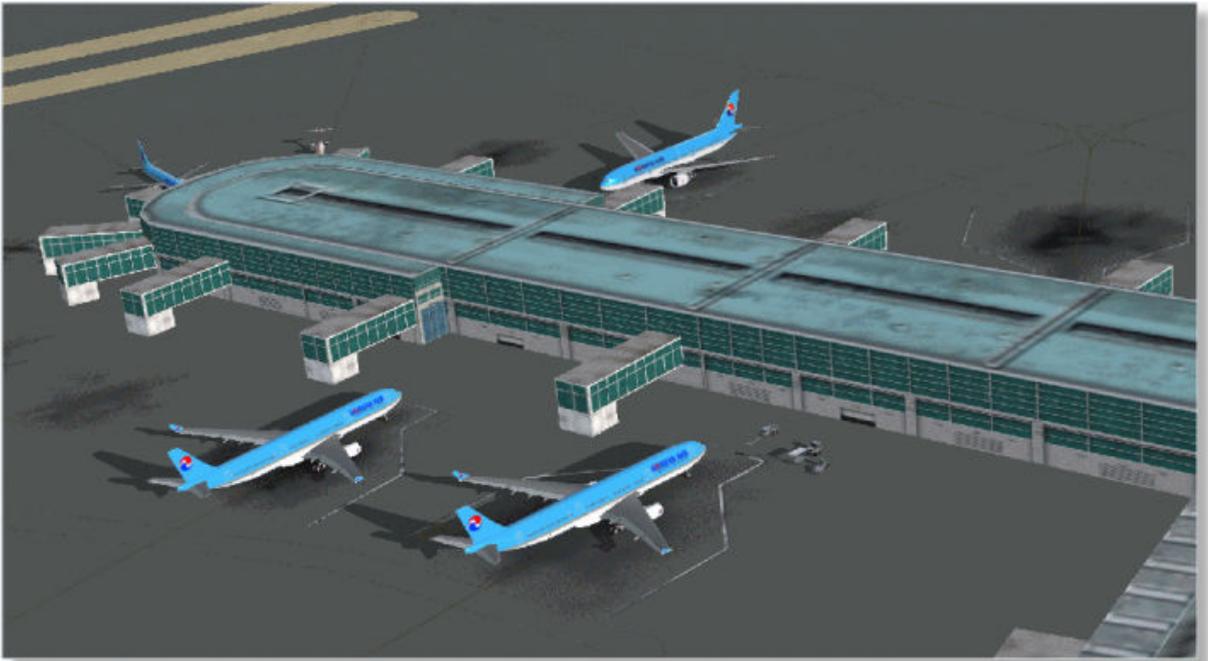

## Asia

Dubai (OMDB)

Hong Kong (VHHH)

Seoul (RKSI)

Tokyo (RJAA)

## Europe

London (EGLL)

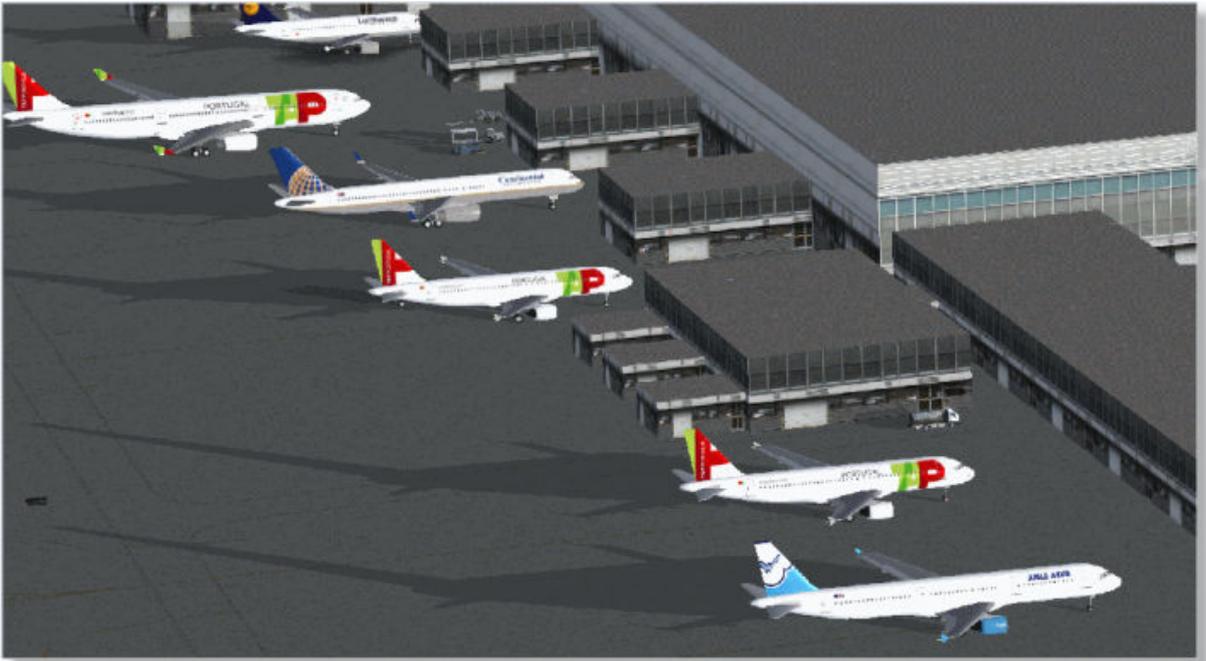

Frankfurt (EDDF)

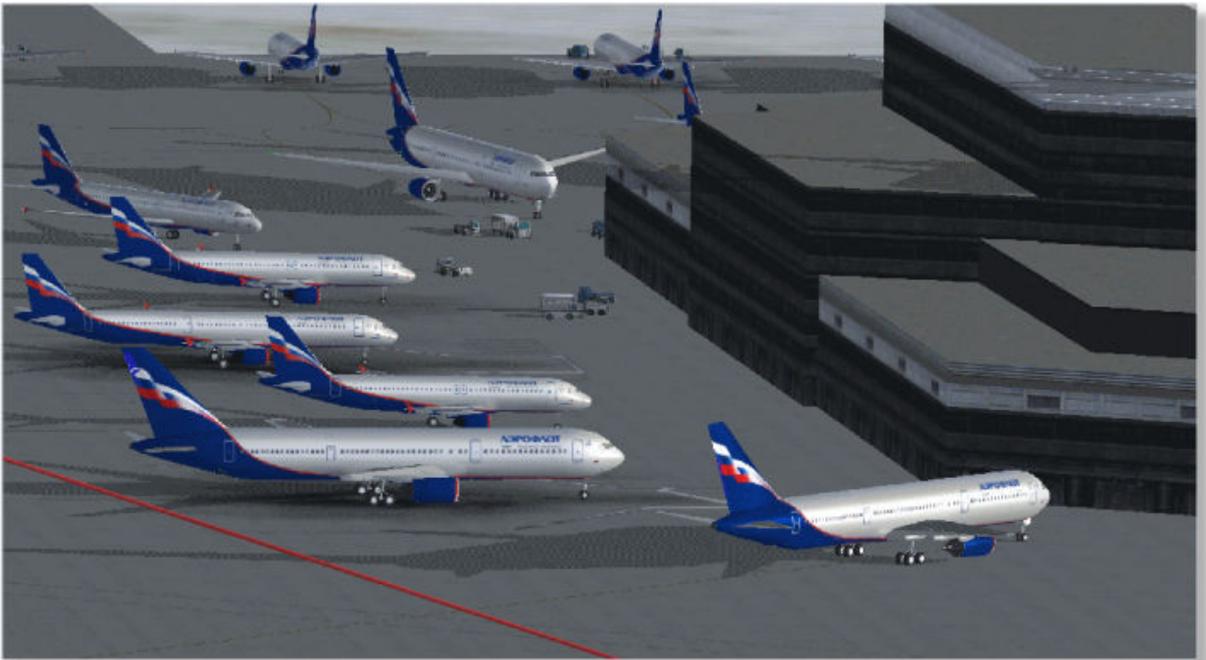

Paris (LFPG)

Madrid (LEMD)

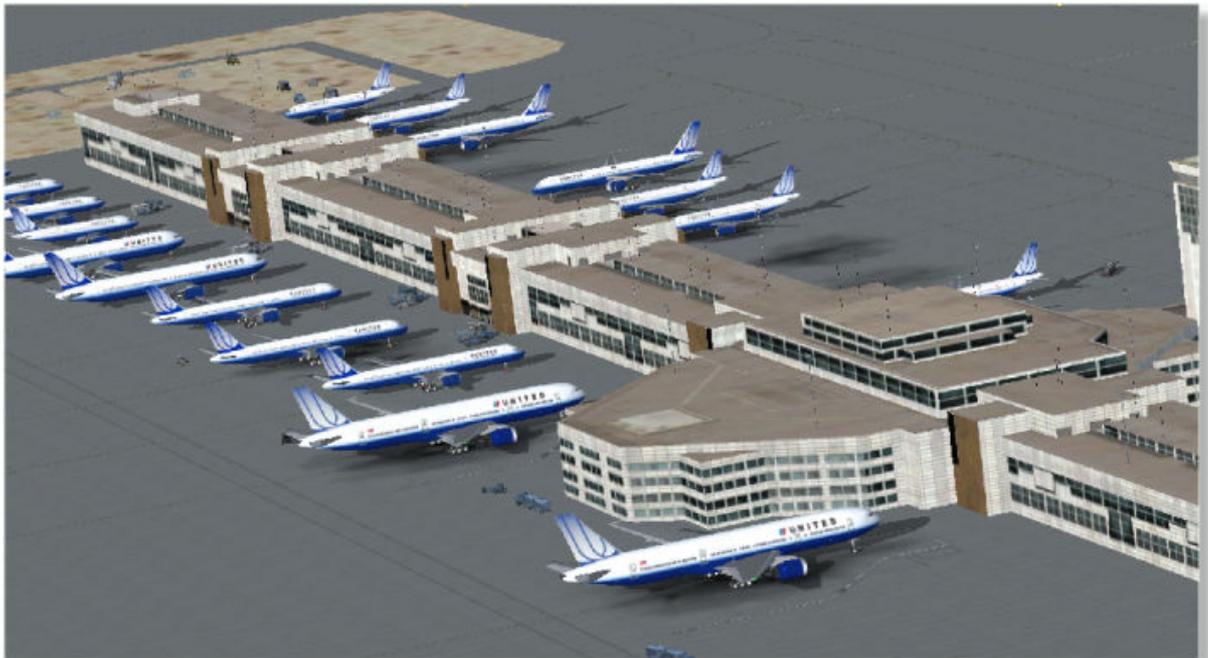

Lisbon (LPPT)

Moscow (UUDD)

**North America**

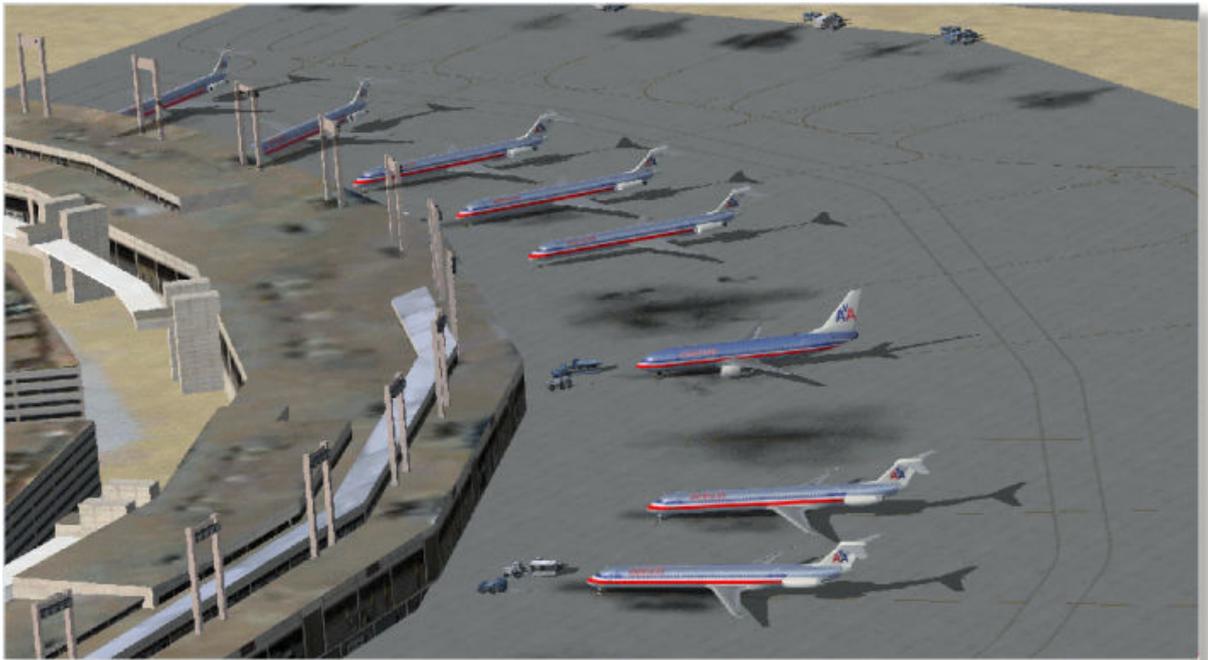

**Denver (KDEN)**

**Memphis (KMEM)**

Louisville (KSDL)

Dallas (KDFW)

Los Angeles (KLAX)

New York (KJFK)

Chicago (KORD)

Toronto (CYYZ)

South America

Rio de Janeiro (SBGL)

Oceania

Sydney (YSSY)

## 2 Getting Started

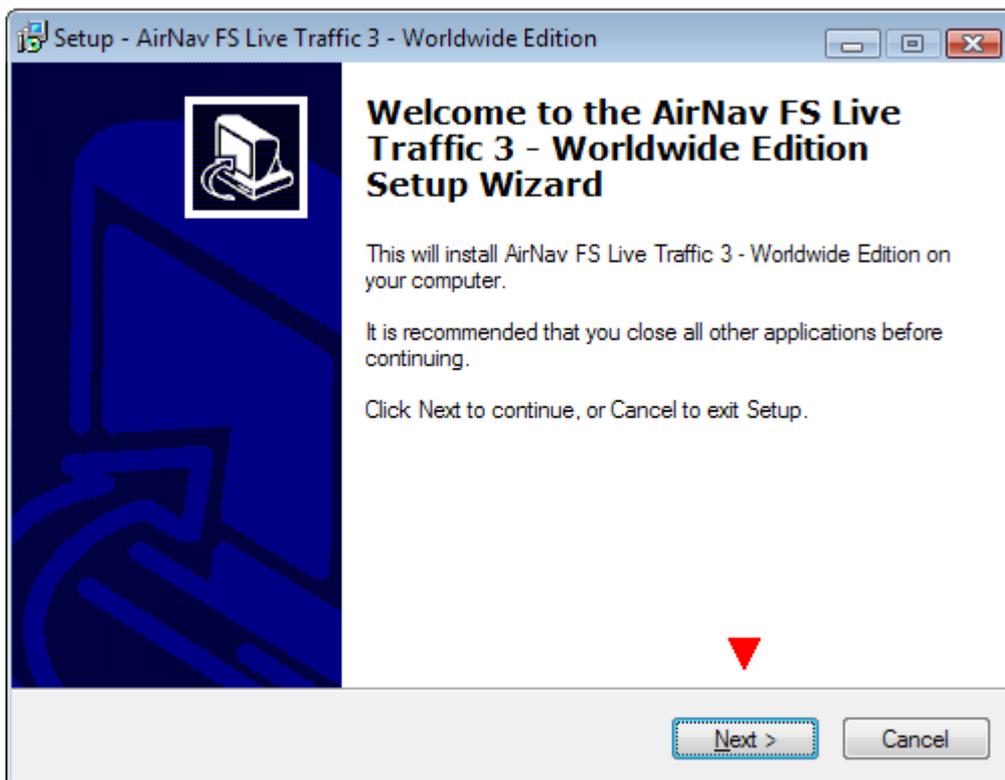

### Installation

1. Run the ANFX.exe file.
2. Click NEXT and read the on-screen information. You will be prompted for the installation path. If this is not detected automatically, enter your Flight Simulator X directory path in the dialog box.
3. Click INSTALL to commence. All files will be directly copied to their final destination, no further action will be needed, you can immediately use the software.

Setup Wizard is complete

## Information for For FS Experts

The AI aircraft will be installed to simobjects\misc, the airports and schedule to addon scenery\scenery.

- Special care is needed if you have MyTraffic X installed, and if you had FS Live Traffic X installed. If you no longer intend to use MyTraffic X, or had FS Live Traffic X, uninstall them before you install AirNav FS Live Traffic 3.

- If you intend to further use MyTraffic X, update to either MyTraffic X 5.2 professional or to MyTraffic 2010, and remove all the aircraft you installed here from simobjects\misc. You will get an immediate benefit from this combinations, that some very rare models and paints that are available in MyTraffic X 5.2b, but not in AirNav FS Live Traffic 2, even appear. It may takes days until such a rare event happens, though, depending on where you fly.

- Users of earlier versions of FS Live Traffic who migrate to AirNav FS Live Traffic 3 should remove the following line from their FSX.cdg file:

**simobjects.6=MyTraffic\aircraft**

Disabling is easy, just delete the bgl. Uninstallation is straight forward with no additional problems.

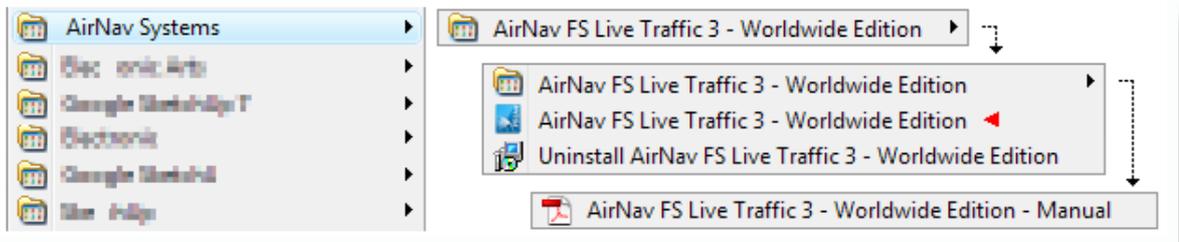

## 2.1 Using the Software

### Starting AirNav FS Live Traffic 3

First of all, be sure Microsoft Flight Simulator X is closed before starting AirNav FS Live Traffic 3.

After installation a new folder is created on your Windows Start Menu. This folder is called AirNav FS Live Traffic 3.

Go to this folder and click on the FS Live Traffic X shortcut or click the desktop icon.

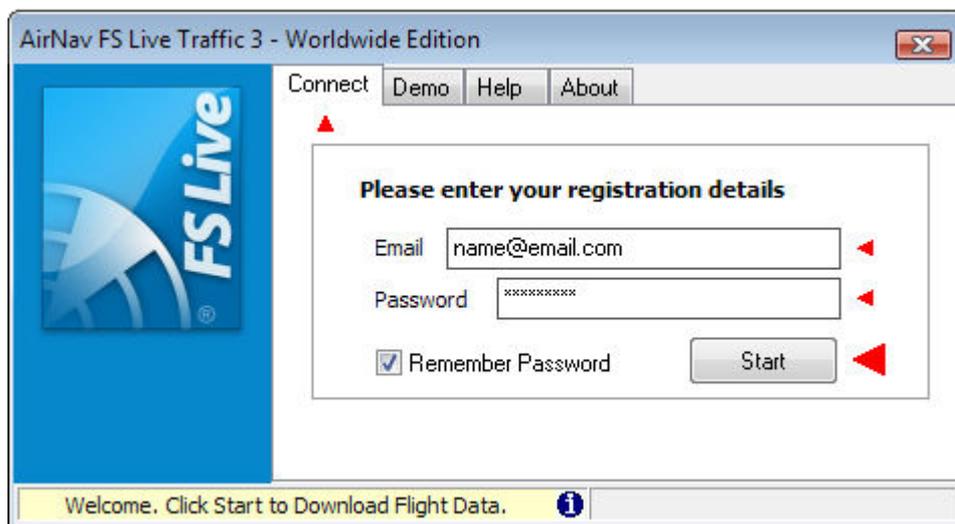

Start Menu folder of AirNav FS Live Traffic 3

Desktop Icon

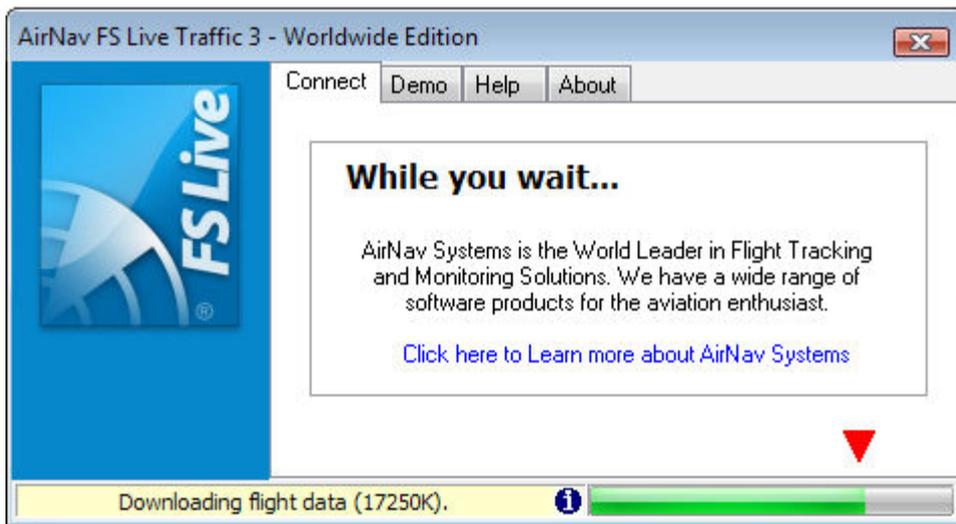

The main application window will open.

Main application window - Connect Tab

If you have already ordered and have your registration codes ready click on the "Connect" tab and enter your username and password.

After this click the "Start" button. Data will be downloaded.

**Flight data download progress**

Once all Flight data has been successfully downloaded you will see the following window:

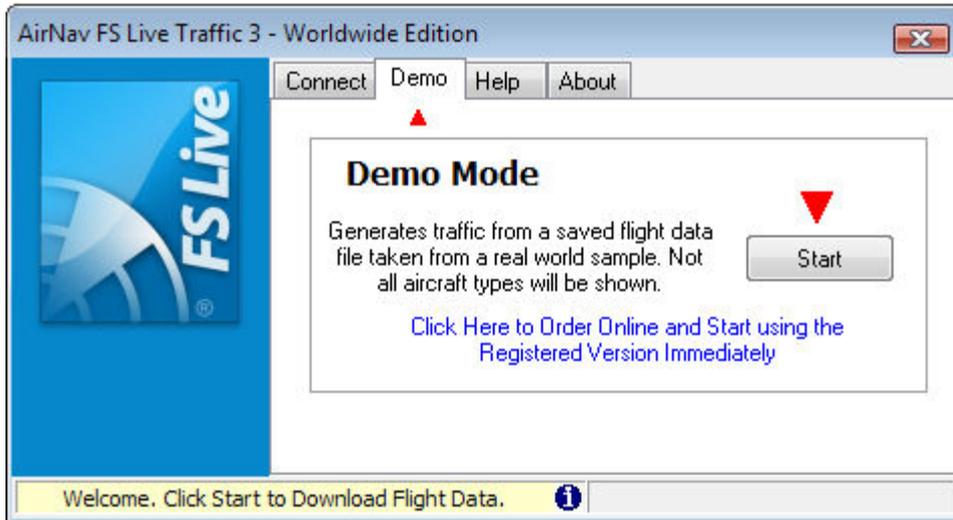

**Flight data downloaded**

You may now close the application and start Microsoft Flight Simulator X. See chapter "[FSX Settings](#)" for details on how to adjust the amount of AI airline traffic shown in Microsoft Flight Simulator X.

## Demo Version

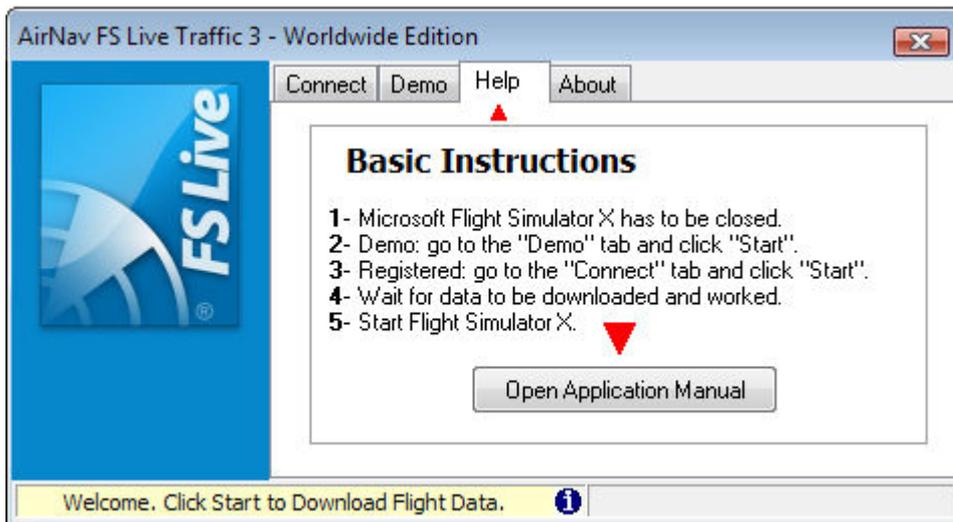

If you are just trying the Demo version, go to the "Demo" tab on the top and click the "Start" button. This generates traffic from a saved flight data file and will only show you some aircraft types (Boeing 737 - all types, Airbus A320, Boeing 747-400).

Main application window - Demo Tab

## Help

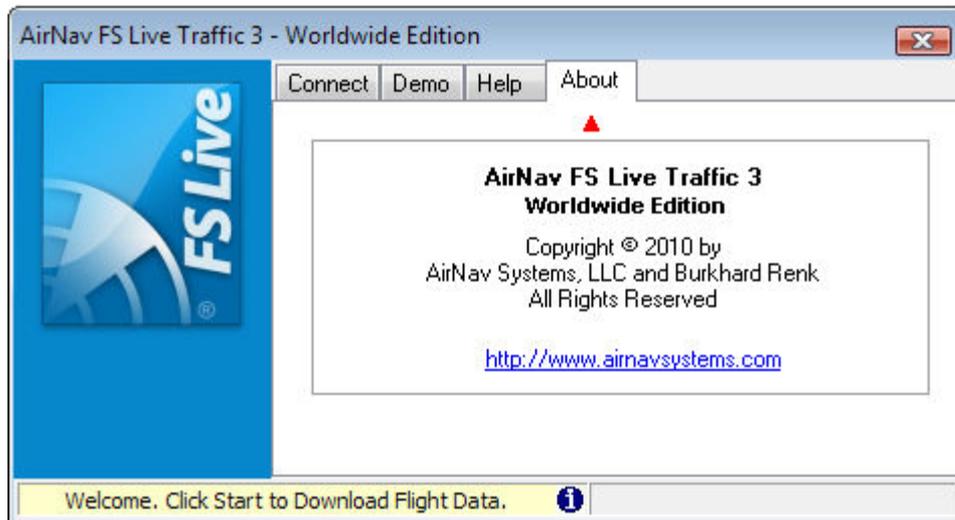

Go to the "Help" tab on the top and click the "Help" button. If you want to read the instruction manual, click the "Open Application Manual" button.

Main application window - Help Tab

## About

Go to the "About" tab on the top and click the "About" button to see application version and contact information.

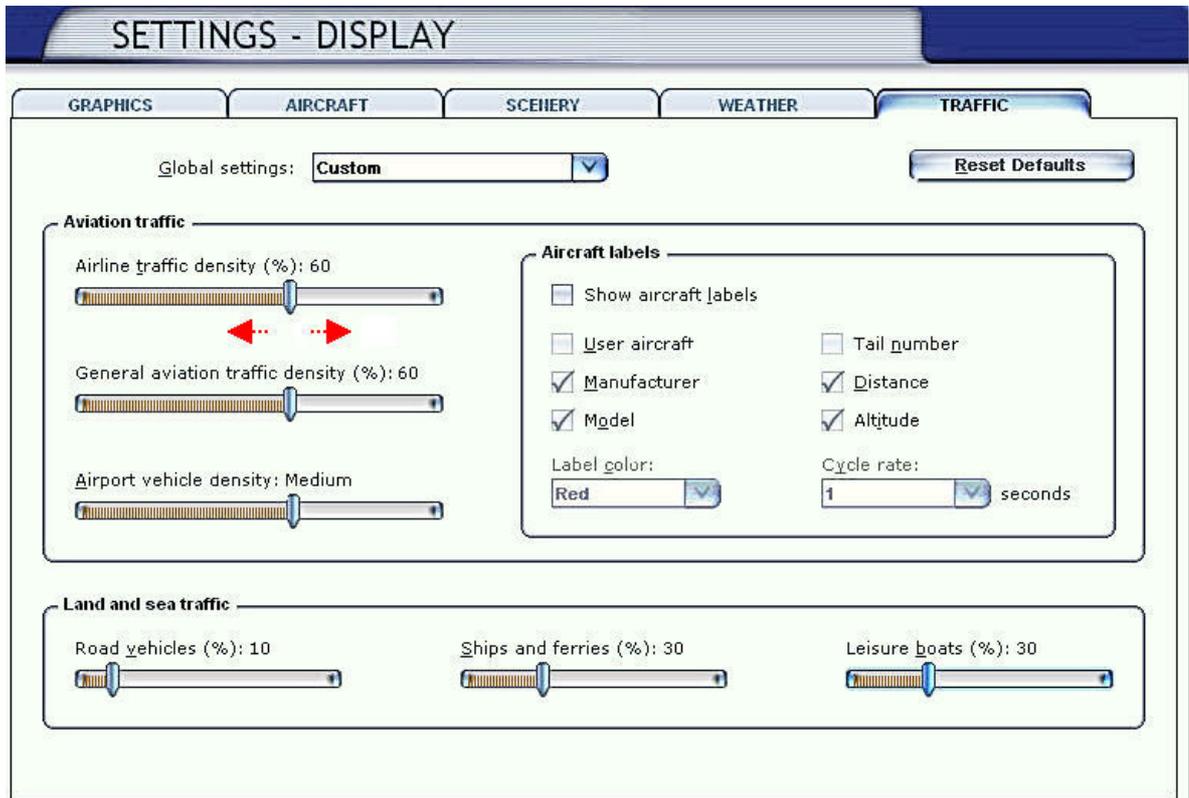

Main application window - About Tab

## 2.2 FSX Settings

### Adjusting the AI traffic in FSX

You can adjust the amount of AI airline traffic to meet the performance specifics of your PC hardware. While in FSX open the settings menu and adjust the slider "Airline traffic density" to a suitable level.

Settings Display window in FSX

---

## 2.3 Technical Information

### Technical Information

By putting the creation of the schedules onto a server at AirNav Systems, a lot of problems have to be taken from the user and are placed in the hands of AirNav. How to handle data problems is solved centrally, you just enjoy the result!

## 3 Registration

### How to Order

To register AirNav FS Live Traffic 3 visit AirNav Systems web site (<http://www.airnavsystems.com>) and click on the "Buy Now" link on the top. There are several ways to register from Online Order with a credit card, to phone and FAX.
